

## F 0066 – Essex/Kent Archival Project fonds

### FINDING AID

This fonds contains records created ca. 1979-1981 in an attempt to identify and catalogue historical records found in both urban and rural parts of Essex and Kent counties which could be of use to those interested in local and family history. At the time, most of these records were not held in formal archives or other repositories, but rather were inactive files held on-site in the institutions that created them. The fonds has been divided into two series.

### Series I: Project Field Work

*This series contains the original index cards used in the field to gather data for the Ontario's Heritage project (ca. 1980-1981?) from both Essex and Kent County locations. These remain as much as possible in their original order, arranged by geographic location and institution. Most subseries contain additional subdivisions, such as municipal institutions, private institutions,*
